# 1. DEFINITION, CONTENT, RECIPIENTS AND CATEGORIES

## 1.1. DEFINITION

Barcelona Producció is an annual public competition for grants in artistic production that are awarded on a competitive basis, focused on the development of artistic projects aimed at the art scene in Barcelona. Structured into a series of diverse categories – individual exhibitions, curatorial projects, research areas, publications, off-site projects and performances – its contents form the core of programming at the Centre d'Art La Capella.

The 2025 edition of the Barcelona Producció competition will select a total of 17 projects: 8 exhibition projects and 9 non-exhibition projects.

## 1.2. CONTENT

The grants will consist of support in developing the artistic project by a professional technical team provided by the Centre d'Art La Capella, including its public exhibition and dissemination and also, depending on the category, coverage of production costs of between 1,500 and 20,000 euros, in addition to a direct financial endowment of between 2,000 and 6,000 euros, as detailed in section 2 of this competition call.

## 1.3. RECIPIENTS

Barcelona Producció is aimed at the art community in Barcelona, including individuals over the age of 18 and groups of people sharing a creative project that designate an adult representative and the people deemed to be the author(s) of the work.

The participating artists must be able to demonstrate a link with the city of Barcelona, to have been trained in the city or to have developed professionally there.

## 1.4. CATEGORIES

### A) Exhibition projects

A total of 8 grants are available for these projects.

The exhibition space continues to be one of the most valued natural habitats of artistic experience, and Barcelona Producció is strengthening its presence through two lines of action in two spaces with antagonistic characteristics: Espai Capella and Espai Rampa.

a) Espai Capella: the centre's iconic space, the central nave of an old hospital chapel, measuring 380 m<sup>2</sup>, with stone walls.

#### a.1. Solo projects in Espai Capella, 3 projects

This category is for exhibition projects and is directed towards artists. Its aim is to support the production of a new project, establishing the procedural dynamics required for the final presentation of the project as an exhibition in Espai Capella.

#### a.2. Curatorial project in Espai Capella, 1 project

This is aimed at people interested in curatorial practice who wish to present an exhibition in Espai Capella. All manner of proposals are welcome for both group and solo shows that place the emphasis on the exhibition aspect, as well as on the different temporalities of the exhibition event (engaging audiences by means of activities, gatherings, workshops, etc.).

b) Espai Rampa: a smaller-scale space that acts as a laboratory in which to test exhibition proposals of a more experimental nature. The relationship with the architecture is not so decisive in this space, for it is a more neutral exhibition hall with white walls and non-monumental dimensions.

#### b.1. Individual projects in Espai Rampa, 3 projects

Projects of an exhibition nature aimed at artists. The goal is to encourage the production of an unpublished project by establishing the dynamics of the process required for the final presentation of the project as an exhibition at Espai Rampa.

#### b.2. Curatorial project in Espai Rampa, 1 project

Espai Rampa is suited to curatorial proposals for solo or group shows adapted to the dimensions of this gallery space. Its smaller scale also allows other types of projects, one of which the relationship with the architecture is not such a determining factor.

## B) NON-EXHIBITION PROJECTS

The purpose of this category is to present projects that are developed and completed outside the format of an exhibition. A total of 9 projects will be selected, and these have been divided into five sub-categories according to the requirements of each proposal.

### B.1. Off-site projects, 2 projects

These are projects that are developed and completed outside the exhibition venue. The proposals can therefore be extremely diverse and varied, from those carried out in other places or in the public space to those that experiment with temporalities that go beyond an exhibition proper (interventions in other institutions, activities with a strong performative component, links with other fields of knowledge, etc.).

### B.2. Research projects, 2 projects

This category covers the presentation of projects that stem from any field of research related to contemporary artistic practices, including projects that focus on theory as well as those that involve research prior to undertaking an artistic project. The aim is to provide support to research processes by offering time and money to conduct research without the pressure of the need to arrive at a final outcome. Nevertheless, a public return is requested as a way to bring the research to a close, which may take the form of a talk, a workshop, a publication or any other format suited to establishing certain conclusions concerning the research.

### B.3. Publication project, 2 projects

This encompasses projects presented as a visual, textual, sound or other publication on a physical support or in any other language. The aim is to encourage the issuing of a publication concerning the visual arts. There are no restrictions regarding theme or format, and publications may range from an essay to a work of fiction or photography book but also any other type of experimental project that is not published in book form.

### B.4. Performance, 3 projects

This includes performance and/or action art projects, action poetry and other intermedia performing arts proposals that do not require any form of temporary exhibition other than an ephemeral public presentation. The grants awarded in this category are intended for specific performative happenings that will make up a programme of performances organised at La Capella. The pieces must not have been shown before and must be presented in the La Capella space. In the case of performative works that must be staged elsewhere, applications should be submitted in the off-site projects category.

## 2. FINANCIAL ENDOWMENT AND TAXATION

### 2.1. FINANCIAL CONTRIBUTION

The artists selected in the Barcelona Producció 2025 competition will receive financial contributions in the form of grants to be paid in half payment amounts in order to develop their artistic work: the first at the outset of developing the selected project and the second at the end of the process. These amounts are expressed in euros and include personal income tax withholding.

## 2.2. PRODUCTION EXPENDITURE

La Capella will have a total of €95,000 as expenditure to cover the production costs of each and every project distributed over the years 2024 and 2025:

These amounts are expressed in euros and include all taxes, in addition to the costs of mounting the public exhibition and fees of the artists participating in the curatorial projects and all persons collaborating with the authors of the selected projects.

Please note that any professional purchases and services commissioned from suppliers outside the national territory must include 21% in terms of self-added VAT because of the reverse charge of the taxable person (Spanish Law 37/1992 on Value Added Tax, Art. 84.U.1.). This self-added VAT expense is to be charged to the project's production budget.

The production money must be used exclusively to produce the project presented in the competition call.

## 3. JURY

The ICUB's executive board, as the body delegated by the President's Office to award grants, scholarships and financial aid, is responsible for awarding the grants.

The competition may be declared null and void if, in the judgement of the jury members, the projects submitted do not meet the selection criteria.
